Fleet Investment Plan 2027

Andino Logística S.A. | Document F07 | Date: 2026-09-25

Proposal

The purchase of 6 refrigerated trucks for USD 840,000 is planned, financed with a 48-month lease. Renewing the fleet reduces estimated fuel consumption by 12%. The final decision is subject to board approval in December.

Item	Detail
Units	6 refrigerated trucks
Amount	USD 840,000
Financing	48-month lease
Estimated fuel savings	12%
Decision	Board, in December

Rationale

Demand for refrigerated transport is growing faster than the capacity of the current fleet, and the oldest units have rising maintenance costs. The new units would make it possible to serve more cold-chain volume and reduce reliance on outsourced carriers during the peak season.

Financing

The lease avoids an upfront outlay and spreads the cost in monthly installments over 48 months. The amount is expressed in US dollars, the currency of the lease contract, and is not converted into pesos in this document. The investment falls under the fleet and warehouses item of the 2027 budget.

Risks

- Exchange rate changes affecting the installments, since the lease is denominated in dollars.
- Delays in delivery of the units by the manufacturer.
- Lower cold-chain demand than expected.

Next steps

Finance will complete the comparison of offers from three suppliers before the December board meeting.
