Sales Quotas and Commercial Budget 2027

Andino Logística S.A. | Document X02 | Date: 2026-10-11

Annual quota 2027

The 2027 annual quota for the sales team is UYU 890 million, distributed by sales representative according to portfolio. The commercial expense budget is UYU 48 million. Quotas are reviewed every semester.

Item	2027 amount
Annual quota of the sales team	UYU 890 million
Commercial expense budget	UYU 48 million

Scope of the quota

The quota corresponds to billing assigned to the portfolios of the sales representatives. It does not include billing from corporate accounts managed directly by management or existing framework contracts, which are budgeted separately.

Commercial expense budget

The budget of UYU 48 million covers travel allowances, fairs and events, sales tools and promotional materials. It is allocated by quarter and its execution is reviewed with Finance.

Semester review

Quotas are reviewed every semester. In July quotas are adjusted according to the evolution of the portfolio, customers won or lost and changes in the team. Adjustments are approved by general management and Finance.

Responsibilities

- Sales: distribute the quota by sales representative and follow up monthly.
- Finance: monitor the execution of the commercial budget and consolidate the information for the board.

Quota distribution

The distribution by sales representative considers the current portfolio, the growth potential of each customer, the representative's tenure on the account and ongoing projects. The sales manager proposes the distribution and general management and Finance approve it. Shared accounts are assigned as agreed in writing.

Monthly follow-up

Sales reports every month the billing achieved by sales representative and compares it with the expected quota progress. Finance validates the figures against actual billing and consolidates the data on the management dashboard.

Commercial expenses

Commercial expenses are allocated by quarter and by type of expense. Representation expenses and trips follow the travel allowance and expense approval policies. Deviations are explained at the follow-up meeting.

Assumptions and risks

The quota assumes the retention of current accounts and the winning of new customers in the refrigerated segment. The main risks are the loss of large accounts, increased competition in last mile and delays in tender awards.

Communication

The individual quota is communicated in writing to each sales representative at the start of the year, together with the review conditions.
